

VIDEO INSPECTION SCOPE

Equipped with a 3.5" scratch resistant, extra-wide, tempered glass screen, and an anti-shock ergonomics design, the "Video Inspection Scope" comes with a 512 MB memory card on board that is capable of storing 14,630 quality pictures or 4 hours of video. This allows Law Enforcement Officers to be able to manage or e-mail pictures or videos taken on site, once they have been downloaded to the computer via memory card or USB cable.

The "Video Inspection Scope" comes with a high capacity battery that requires only 2 hours to fully recharge and is capable of running for 4 continuous hours on a full battery which makes it an indisputably one of the most portable and desirable video inspection product in the market.

Includes a rugged and waterproof storage case

Inspection shaft:

- Water and chemical resistant
- Small 5.5 mm shaft diameter
- 36" standard shaft

Actual picture taken from the video inspection scope

NEW!
